

## Tone Fink

Art does not reproduce the visible, it makes visible (Paul Klee)

T. Fink, born in Schwarzenberg in Bregenz shortly before the end of the Second World War, is one of the greatest performer of the Austrian art scene. His works can neither be categorized nor classified - he uses every genre masterfully in artistic genre and technique and ironically in moral philosophy. His creative range reaches from drawing, works on canvas and objects to short films, performances and installations.

obviously, it makes things unseen manifest.

Tone Fink's passion for paper also revealed to his plastics – he uses paper material, by no means fragile are the resulting objects that are often located on the border between sculpture and functional objects and are often integrated into the performative actions of the artist.

Tone Fink is a thoroughbred artist who Graphical and Biographical visionary and joke rich diffused and plays around creative with puns and neologisms - ". The deep and fatal pitfall in the visual arts and in life is the function of the intellect rather than the inspiration" - the ability to follow his intuition and also to be able to again become the child during the artistic process, Tone Fink makes so distinctive.
